

SMART Hub SE interactive whiteboard system

With the SMART Hub SE interactive whiteboard system, all it takes is one button to start whiteboarding right away. Experience easy-to-use whiteboarding and data conferencing in a PC-free environment with this integrated system. It combines the SMART Hub SE, the SMART Board™ 600i interactive whiteboard system, a mounting frame and cabling.

Walk up and use

A new project comes up, and your team needs to coordinate immediately. With the simple user interface of the SMART Hub SE interactive whiteboard system, your team can start whiteboarding and sharing data right away, locally or remotely. The system lets you quickly write notes on the interactive display. And when you are finished, you can save your work on a USB key and distribute it by e-mail.

Connect a laptop

A prospective partner drops by your office to make a proposal. How can he quickly display his material without a lot of setup time? The SMART Hub SE system lets users connect a laptop wirelessly or through a VGA cable so that presentations can be displayed on the interactive whiteboard right away. And since presenters only connect to the SMART Board interactive whiteboard, your network is secure.

In-room and remote collaboration

No matter where your team members are located, the SMART Hub SE interactive whiteboard system lets them participate. In-room participants can wirelessly connect a laptop to the meeting software on the interactive whiteboard. You can also invite remote participants by e-mail, and in a matter of seconds they'll be working with you and sharing screens as if they're in the same room.

- 1 SMART Board interactive whiteboard** – a touch-sensitive display that connects to the SMART Hub SE system and projector
- 2 Unifi™ 45 projector** – an integrated XGA (1024 x 768) projector with collapsible boom
- 3 Metal frame** – access VGA, audio, USB ports and the reset button
- 4 Pen Tray** – pick up a pen or the eraser, and the Pen Tray automatically detects the selected tool

Key features

Computer-free whiteboarding

Create notes in digital ink, then edit, capture and distribute.

Wireless local and remote data conferencing

Share laptop screens and content within the meeting room and in real time with colleagues around the world.

Video annotation

Write and capture digital notes over video formats, such as DVD and VCR.

Network monitoring

Monitor your SMART Hub SE system remotely via a Simple Network Management Protocol (SNMP) agent.

Touch-sensitive display

Control computer applications directly from the display, write notes in digital ink or save work to share later with the touch of a finger.

Unifi 45 projector

Protect the system against inadvertent damage or misuse with an integrated XGA (1024 x 768) projector combined with a unique collapsible boom.

Closed projector engine

Cleaning or filter replacement is not required for the Unifi projector, which uses DLP® technology.

Warranty

Three-year warranty on the Unifi projector, 90-day or 500-hour warranty on the lamp. The SMART Board interactive whiteboard warranty is five years upon product registration, two years standard.
