

Rear Projection

SMART Board™ 4000i interactive whiteboard

Experience ultra-crisp visuals

The 4000i is a stunning SXGA+ rear-projection interactive whiteboard that displays ultra-crisp visuals.

An ideal solution for command-and-control, simulation, satellite imagery and other applications that require highly detailed visuals, this rear-projection interactive whiteboard features a brighter projector, which provides vivid, high-resolution images. The projector's short-throw lens saves space by producing a wide image from a shorter distance.

The bigger picture

With more surface area than a plasma screen, the large 66" (168 cm) shadow-free screen of the 4000i focuses the attention of everyone in the room, and its touch control features help keep your audience engaged and facilitate collaboration.

Control your computer by touching the large display screen – your finger becomes the mouse. Write in digital ink over any software application, including moving video, and then save everything into a single file. Print, post or e-mail your notes so everyone can have a copy.

Mobile multimedia

Encompassing a projector, audio system, floor stand and SMART Board™ interactive whiteboard, the 4000i is a portable integrated multimedia unit that can easily be moved from one location to another.

The 4000i gives you the flexibility to connect and switch seamlessly between a laptop or other multimedia device. A built-in sound system gives you one-button volume control for all your multimedia equipment.

"The high-resolution display and large format provided by the 4000i make it a perfect medium for instructor presentation and student interaction with the simulated systems and components"

Phil Benson, integrated maintenance training system program manager, Atlantis Systems International

Dimensions

Screen area

66" (167.6 cm) diagonal 4:3 aspect ratio

Size

57 3/8" W x 79" H x 29 1/4" D
(145.8 cm x 200.7 cm x 74 cm)

Weight

460 lb. (210 kg)

Features

- 1 Touch surface
- 2 SMART Pen Tray
- 3 Control panel
- 4 Speakers
- 5 Locking door
- 6 Locking casters

Key features

- **Projection system** – An SXGA+ (1400 x 1050) DLP based projector with short-throw lens, 3,000 lumens projector and 2,500:1 contrast ratio.
- **Touch system** – DViT™ (Digital Vision Touch) technology is the magic behind SMART's proprietary digital touch system. It lets you use your finger as a mouse and write in digital ink on the screen – without special tools or a reduction in image quality. Cameras track contact on the screen.
- **SMART Pen Tray** – Sensors detect when a pen or eraser tool is picked up from the SMART Pen Tray. Buttons on the tray also allow you to choose an On-Screen Keyboard or a right mouse button.
- **Space-saving cabinet** – The 29 1/4" (74 cm) deep, tapered, mobile cabinet fits easily into corners.
- **Audio system** – An integrated audio system includes stereo-amplified speakers controlled from the front of the unit.
- **SMART screen** – The diffusion screen reduces glare to deliver a high-contrast, uniform image with a wide viewing angle.
- **Control panel** – Projector power, input sources and volume controls can be controlled at the front of the unit.
- **Laptop support** – The shelf and connection cables attach to either side of the cabinet. An additional shelf is optional.
- **Locking casters** – Four durable casters make the 4000i easy to reposition.
- **X-Port™ 20 switch** – Using the control panel, switch between your computer and a connected laptop.
- **Connection panel** – Connect a second projector, external audio system, network, printer or other serial device.
- **Wireless keyboard and holder** – Use the standard Microsoft® Windows® operating system keyboard with built-in trackball.
- **Room-control module (optional)** – This module integrates the 4000i control panel with a room-control system.
- **Warranty** – Two-year limited equipment warranty on screen, cabinet and projector. 90-day warranty on the projector lamp. Projector and lamp warranty provided by Epson®.

SMART Board software

Ever wonder what makes SMART Board interactive whiteboards so powerful? Meet SMART Board software – the real genius behind the world's number one interactive whiteboard.

Notebook™ software

- Create, manage and save materials into a single, presentation-ready file. Export files to clients and colleagues. Integrate digital content, such as Adobe® Flash® files and audio and visual components into presentations. Arrange pages using the Page Sorter. Use Dual Page Display to view two pages simultaneously. You can draw, take notes, and attach files or link to objects and websites on either page.

Ink Aware

- Use a pen from the pen tray or a Pen button to write into Ink Aware applications, such as Microsoft Excel®, PowerPoint® slides, Word files and AutoCAD®, and save notes directly into these files.

SMART Board Tools

- Type with the On-Screen Keyboard, make a video file with the SMART Recorder, write over video using the SMART Video Player, and focus and prioritize concepts with the Screen Shade and Spotlight.

LinQ™ software

- Connect quickly between devices using a wired or wireless network. Use a laptop to share files and control applications on the interactive whiteboard (and vice versa).

Software system requirements

- Supports Windows, Mac OS and Linux® operating systems.
