

# SMART Board™ Software 9.5: A Feature Comparison Between Microsoft® Windows® and Macintosh Releases

Although SMART Board software 9.5 is designed to work consistently between the Microsoft Windows and Macintosh platforms, differences between the two operating systems require the modification or elimination of some features and functions.

Features and Functions Available to Only One Platform		
Function	Windows Computers	Macintosh Computers
Import and export Microsoft PowerPoint® files	You can export Notebook software documents in PowerPoint format if PowerPoint software is installed on the same computer as SMART Board software. You may also export PowerPoint documents in Notebook™ format if both applications are installed.	Not available.
Customizable Notebook toolbar	Not available.	You can add or remove items from the toolbar by <b>Control-clicking</b> the Notebook toolbar and selecting <b>Customize Toolbar</b> .
Print capture	You can direct any print output to Notebook software by selecting <b>SMART Notebook Print Capture</b> from the list of available printers in any application.	Not available.
E-mail support	You can e-mail both Notebook and .pdf documents using the <b>Send To</b> menu item.	Not available.
Microsoft Office ink awareness	You can use the Pen tool to enter text or objects in all Microsoft Office applications.	Not available.
Handwriting recognition in Gallery search	You can start the handwriting recognition application by pressing the <b>Pen Input</b> button in the <b>Gallery</b> tab.	Not available.
LinQ™ software	LinQ software can send your computer's display over the network to an interactive whiteboard without using additional cables.	Not available.
Auto-hide Page Sorter	You can auto-hide the Page Sorter in Notebook software by selecting the <b>Auto-hide</b> check box at the bottom of the Notebook Page Sorter.	Not available.

Features and Functions Available with Modifications to Both Platforms		
Function	Windows Computers	Macintosh Computers
Dock side window on either side of the screen	You can move both the Page Sorter and scrollbar to either the left or right side of the screen by pressing the <b>blue arrow</b> under the tabs.	You can move the Page Sorter to either side of the screen, but the scrollbar cannot be moved.
Handwriting recognition	Notebook software recognizes both printing and handwriting in several languages.	Notebook software recognizes printed text in English, as required by Macintosh Ink functionality restrictions.

Multiple concurrent Notebook files	You can edit multiple files at once by opening multiple instances of Notebook software.	You can edit multiple Notebook files at once by opening as many document windows as necessary.
Export to image	You can export Notebook files into .jpg, .png, .gif or .bmp image formats.	You can export Notebook files into .jpg, .png, .bmp or .tiff image formats.
Export to PDF	You can export .pdf files with links and file or hyperlink attachments.	You can export .pdf files with links in Mac OS X 10.4 and later, but attachments are not available.
Spell check	You can check your Notebook document for spelling errors by pressing the <b>Edit</b> menu item and selecting <b>Spelling Check</b> . Notebook software is not able to check spelling as you type.	You can check the spelling of your entire document by pressing the <b>Edit</b> menu item, selecting <b>Spelling</b> and then <b>Check Spelling</b> , or <b>Check Spelling As You Type</b> to inspect your text entry as it appears.
Attachments to Notebook files	Press the <b>Insert</b> button in the Attachments tab of the side window; then select the type of attachment you wish to apply.	You can add an attachment by pressing either the <b>Web link</b> or <b>Link to file</b> button inside the Attachments tab of the side window.
Creating notes over video	You can write notes over video using the SMART Video Player.	You can create notes over video without additional software.
SMART Recorder functionality	You can record actions inside a selected area or screen window to a video file, and share the saved file with others.	You can record actions inside a selected area or screen window to a video file, but sharing is not available.
On-screen keyboard	You can use the on-screen keyboard in standard or upper case touch-sensitive views, or by Pen tool input.	You can use the on-screen keyboard in the standard touch-sensitive view only.
