SMART Notebook™ 11
collaborative learning software

SMART Notebook software offers more creative power and flexibility than ever before, with many new tools and features to help you create and deliver lessons more easily, more quickly and with greater impact. SMART Notebook also gives you the flexibility to create more extraordinary learning moments in your classroom.

Create lessons with ease

Using SMART Notebook software just comes naturally – whether you're a first-time user or an expert. The icons and menus are intuitive, so you always know what to do next. The adaptive toolbar puts all the creative tools at your fingertips – fewer clicks means everything you do is easier and faster. When you choose a tool, the menu options change accordingly, so everything you need is always in the right place. And the activity builder makes it easy to create sorting and labeling activities that are interactive and engaging.

Access a wealth of content

SMART Notebook software provides easy access to a wide selection of content. With the embedded browser, any web resource can instantly become part of your SMART Notebook lesson. Add a live web page directly to a SMART Notebook software page, and it becomes an object that you can write over in digital ink, resize or interact with. And since the browser is embedded, everything happens within the software, so you never have to leave your lesson. You can also access over 50,000 learning resources on the SMART Exchange™ website, including ready-made lessons and widgets that can add an extra level of interactivity to your lessons.

Add interactivity to instruction

SMART Notebook software is the interactive foundation for many of our products. Once you have the software, you can easily integrate other SMART products into your lessons. SMART Notebook supports the multitouch capabilities of the SMART Board® 800 series interactive whiteboard, helping students interact with lesson material in richer and more engaging ways. You can easily incorporate assessment into your SMART Notebook lessons with SMART Response™ interactive response systems. And, using 3D Tools for SMART Notebook software or Mixed Reality Tools for SMART Document Camera™, you can add 3D content to make complex or abstract concepts more understandable and engaging.

"I'm finding the tools in the right place at the right time. It's like the design team designed the accessibility and interaction with a teacher's mind and placed the tools where we naturally go to find them."

Ronald Fisher, Teacher,
Century Elementary School,
Bear River City, Utah, United States

Key features

Create

Activity builder – New in SMART Notebook 11
Create activities where objects react to actions by accepting or rejecting other objects and by triggering animations or sound. The activity builder is ideal for arranging, sorting, labeling and other activities.

Insert sound
Add sound to objects in your SMART Notebook lesson with one click. You can browse the Gallery for audio files of famous speeches, animal sounds, phonics, instruments and more.

Sound recorder – New in SMART Notebook 11
Record sound directly into your SMART Notebook lesson, with no need to switch between programs and files

Crayon – New in SMART Notebook 11
Draw authentic-looking crayon pictures in any color

Custom creative pen – New in SMART Notebook 11
Build your own creative pen using any image you choose. It's a fun way to engage students in a lesson.

Table tool
Create a table from the SMART Notebook software toolbar, then insert or drag text, images and objects into any cell. Cells are also easy to scale and move.

Themes
Create themed pages using elements such as fonts, colors and images, and apply them to SMART Notebook software pages

Page groups
Organize the pages of a SMART Notebook file into groups. Drag pages into the groups, add new pages and show one group at a time in the Page Sorter.

Teach

Internet browser – New in SMART Notebook 11
Add a web browser directly onto a SMART Notebook software page. Browse to a website and interact with the content by drawing or writing over the page. You can even drag and drop images into your lesson.

Adaptive toolbar – New in SMART Notebook 11
Choose a tool and the adaptive toolbar changes, so all the tools you need are right in front of you

Gestures
Zoom, pan, flick and swipe on your SMART Board 800 series interactive whiteboard. It's easy to scale objects or pages, toss an object or swipe between pages. You can also touch the interactive whiteboard to shake objects to group and ungroup them.

Magic Pen
Use this three-in-one tool to spotlight, magnify or zoom in on an image, or to make notes or drawings that disappear after 10 seconds

Recognition features
Write notes in digital ink and transform them into text, or draw a freehand shape and SMART Notebook will recognize and perfect it

Screen shade
Conceal and reveal information, dragging the Screen Shade over your SMART Notebook software page

Page recording
Teach a concept in SMART Notebook and record every step you take. In the replay, students will only see the on-screen actions.

Reset page – New in SMART Notebook 11
Quickly reset a page in a SMART Notebook file to its last saved state with one touch

Irregular shape fill – New in SMART Notebook 11
Draw any closed shape and then fill your drawing with solid colors, two-color gradients, images or patterns

Manage

Customize toolbar – Put your most frequently used tools on your SMART Notebook software toolbar as a handy shortcut. Move the toolbar to the bottom of the screen for smaller students.

Export files – Save SMART Notebook files in various formats, including .ppt, .pdf, .iwb and .html. You can also save individual SMART Notebook software pages as separate image files (.jpeg, .png or .gif) for easy sharing.

Administrator Toolkit – Take advantage of the Install Manager, which lets you install SMART Notebook on networked computers

Content

The SMART Exchange website
Discover more than 50,000 easy-to-use, relevant, classroom-ready resources and a growing online community

Integrated widgets – New in SMART Notebook 11 Add enhanced functionality to your SMART Notebook lessons by using widgets that integrate with the software. You can download these widgets from the SMART Exchange website.

Gallery Essentials
Choose from over 7,000 learning objects to enhance your lessons, including images, backgrounds, dynamic Adobe® Flash® files, video and audio content

Team content – Use the Team Content feature to access common Gallery content on a shared network drive

System requirements

Supports Microsoft® Windows® and Mac operating systems. A version of the software is also available for Linux® operating systems, but some features may not be available. Find more details on our website at smarttech.com/notebook.
