SMART Response™ VE
interactive response system

SMART Response VE is cloud-based software that enables students to respond to planned and spontaneous questions using any Internet-enabled device, from anywhere.

Gain immediate insight into student understanding using Internet-enabled mobile devices. The SMART Response VE interactive response system is cloud-based software that enables students to respond to questions from their Internet-enabled phones or devices. SMART Response VE integrates with SMART Notebook™ collaborative learning software, providing you with one application for creating lessons and delivering assessments.

Engage students on any device, anywhere in the world
Keep students engaged in lessons by giving them a way to respond to questions using the mobile devices they love and use every day. During lessons, students can access the website for SMART Response VE from anywhere in the world, giving you the ability to gauge their progress and evaluate their understanding no matter where they are located.

Integrates with SMART Notebook software
It's easy to spontaneously add questions to lessons and prepare quizzes, tests and exams. SMART Response VE is fully integrated with SMART Notebook software, consolidating lesson creation, delivery and assessment within a single application. And because no software installation is required on students' devices, students can respond to assessments during lessons using any Internet-enabled device.

Evaluate student understanding
Student responses are automatically summarized in a pie chart or bar graph, where you can instantly evaluate comprehension and adapt your lesson to ensure every student understands. The software also includes Teacher Tools, enabling you to view and manage all student assessment data in one location.

Stay ahead of the technology curve
With the cost-effective subscription model, you'll always have the latest features in a future-proof solution that lowers total cost of ownership. And the browser-based software provides the flexibility of investing in a variety of mobile devices while continuing to use SMART Response VE.

A Manage data using Teacher Tools

B Automatically summarize student responses in a pie chart or bar graph in SMART Notebook software

1 Mobile device-enabled – for use on Internet-enabled devices, including tablets, smartphones or laptops

2 Question types – true or false, yes or no, multiple choice, multiple answer, numeric response and short answer

Key features

Integration with SMART Notebook
Create dynamic questions and assessments by accessing SMART Response VE directly within SMART Notebook software. SMART Response VE is seamlessly integrated with SMART Notebook software, giving you one application for creating lessons, delivering assessments and evaluating student understanding.

Mobile device-enabled
Students respond to assessments using Internet-enabled devices, such as computers, iPhone, iPod Touch or iPad mobile digital devices, and smartphones on the Android™ mobile technology platform or with Blackberry® OS 6.0 or 7.0. To complete assessments, students simply enter the assessment ID on the website to receive and answer the questions you have created.

Multiple question types
Design assessments using six question types – true or false, yes or no, multiple choice, multiple answer, numeric and text response.

Lessons with integrated questions
Compile tests for formative and summative assessment, prepare quizzes or exams in advance and ask spontaneous questions to gauge student comprehension at any point during a lesson.

Content pages
Measure student comprehension during any lesson by inserting questions between content pages in SMART Notebook software.

Weighted marking
Assign different point values to individual questions within a test or quiz, or adjust student scores in the built-in gradebook.

Display test results immediately
Display test results in easy-to-view pie charts or graphs. You can also view results in detail, so you can see exactly how each student has performed.

Anonymous mode
Allow your students to respond with complete confidentiality.

Self-paced delivery
With access to questions directly on their mobile devices, students can work at their own pace without the need for paper copies or common displays.

Teacher Tools
Use Teacher Tools to access reports that are automatically collected and saved to one easy-to-access file. You can also use the built-in gradebook to track student performance and record test results throughout the year.

Tagging
Tag student names and assessment questions with keywords, educational standards and cognitive levels to track specific characteristics that will help you measure and evaluate student performance.

Multiple print options
Print quizzes as handouts that students can complete at their own pace, or add comments to completed tests that can be printed and used later as study guides.

Privacy setting
Use the privacy mode in the system's built-in gradebook to ensure sensitive student identification details and test scores aren't seen by other students or teachers.

Importing questions
Import question sets from SMART Exchange, Microsoft® Word® (Windows only), PDFs (Macintosh only) or ExamView® (xml format or HTML format for ExamView versions 5.2.1 and 6.2.1) Assessment Suite, versions 5.2.1 and 6.2.1.

Exporting results
You can export results to gradebook file formats, including Microsoft Excel® (Windows only), HTML pages, .csv file, Pearson PowerTeacher™, Schoolnet® GradeSpeed, eSembler™ or a custom format.

Education standards tagging
You can select tags from a comprehensive list of educational standards and cognitive level tags for the questions you create in SMART Notebook software or you can create custom tags.

System requirements
SMART Response VE is compatible with Microsoft Windows® and Mac operating systems. For full system requirements, please visit smarttech.com/response.
