The 800ie system enhances the way your teams work together, leading to their increased effectiveness and efficiency. With the press of one button, two or more people can immediately begin brainstorming through on-demand functions like whiteboarding, web browsing and PDF viewing. And its ease-of-use, full integration and reliability accelerate the adoption of the system into everyday processes.

Discover new ways to drive productivity
Collaboration sessions can begin immediately on the 800ie system. Team members can hold interactive brainstorming sessions using the whiteboarding function, browse the Web and view PDFs. All meeting notes and annotations can be saved to a pre-configured network drive, a USB flash drive or a connected laptop, and they can also be distributed via e-mail. And it’s easy for remote participants to join in on these sessions in an interactive way. These benefits, combined with its ease-of-use, help to facilitate your teams’ rapid adoption of the 800ie system and increase their productivity.

Enhanced security, reduced system maintenance
The 800ie is a fully integrated, appliance-based system designed for environments without an in-room computer or where there is little reliance on IT support. Its simplified, on-demand functions, quick and easy laptop connection and locked-down system design minimize IT support requirements and increase reliability. And while meeting notes can be saved anytime to a network location or a USB flash drive, or distributed via e-mail, the system does not keep any residual data, preventing those in a meeting room from accessing confidential information from previous meetings.
any application. Inject digital ink as text or images into Microsoft® Office applications and Adobe® Acrobat® Professional.

Multiuser Pen Tray
Pick up one of the pens or the eraser, and the Pen Tray automatically detects the tool selected. It also has two wings on the side that enable you to add accessories, such as the extended control panel.

On-demand functions – begin collaboration sessions immediately after turning the system on by having instant access to whiteboarding, web-browsing and PDF-viewing functions.

Features
Intuitive on-demand functions
Easily access whiteboarding, web-browsing and PDF-viewing functions immediately after turning the system on.

Appliance control panel
One-button-on design with LCD display and USB port.

Natural user interface
Simply touch the interactive whiteboard with your finger – no special tools required. One person can use two fingers to gesture, or two people can touch at one time.

Freestyle interaction
Two people can work together anywhere on the interactive whiteboard. It’s a seamless, natural experience – just start writing or moving objects.

Touch gestures
Convenient, creative shortcuts for working with content include one- and two-finger navigational gestures (e.g., panning, flicking pages), object gestures (e.g., zoom, toss, rotate) and other gestures supported by multitouch operating systems.

Object awareness
Enables natural movements that close the gap between the physical and digital worlds. The interactive whiteboard automatically recognizes when you switch between using a finger, pen or the eraser. You can even use your fist as an eraser, just as you might on a blackboard.

SMART Ink™
Just pick up a pen and start writing. It’s a natural, accurate and smooth writing experience. SMART Ink intelligently smoothes a user’s handwriting to improve legibility and supports annotation over any application. Inject digital ink as text or images into Microsoft® Office applications and Adobe® Acrobat® Professional.

Multiuser Pen Tray
Pick up one of the pens or the eraser, and the Pen Tray automatically detects which tool you’ve selected. Buttons on the Pen Tray select the color and launch the On-Screen Keyboard, right-click and help functions.

Professional aesthetics
The system integrates easily into collaborative workspaces.
