

SMART Board™ 600i

interactive whiteboard system

Dual touch

This SMART Board interactive whiteboard is also available in a dual-touch model. With a dual-touch SMART Board interactive whiteboard, teachers can switch seamlessly between single and dual-user mode in SMART Notebook™ collaborative learning software. When in dual-user mode, the interactive whiteboard has two separate work spaces, enabling two students to touch or write simultaneously on it.

The SMART Board 600i interactive whiteboard system combines an award-winning SMART Board interactive whiteboard, a SMART UF55 projector and an extended control panel.

Adding flexibility to instruction, the 600i enables teachers to easily access and control all their classroom technology from one source. It's a complete system that offers extraordinary features at an affordable price.

Enhance teaching experiences

With the 600i, teachers have centralized control over the SMART UF55 projector and classroom peripherals. The extended control panel enables them to start the system in 10 seconds and easily switch between multimedia devices such as DVD players, document cameras and laptops.

The system has a sleek and integrated design that keeps the boom-mounted, short-throw projector out of the way, ensuring shadows and other distractions don't interfere with teaching and learning.

Simplify installation and maintenance

The 600i is easy to install, manage and protect. The projector is located directly above the interactive whiteboard, eliminating the need for complicated wiring or ceiling mounting. And since the system is networked, you can connect the projector to your school's IP network to remotely control and manage it.

Expand your work space

For classrooms that use widescreen laptops or monitors, the 600i is one of the only systems available in a wide-format option. Offering 20 percent more space, the 685i3 gives teachers extra room to work. It combines the 87" (221 cm) wide-format SMART Board 685 interactive whiteboard with the SMART UF55w, a projector with a 16:10 aspect ratio and native WXGA (1280 x 800) widescreen projector resolution.

- 1 SMART UF55 projector – an integrated XGA (1024 x 768) projector that offers a 4:3 native aspect ratio and support for 16:9, 16:10 and 4:5 ratios
- 2 SMART Board interactive whiteboard – a touch-sensitive interactive whiteboard that connects to your computer and projector and shows the computer's desktop image
- 3 Extended control panel – provides centralized control over classroom technology

Key features

Touch Recognition

You can write with a pen, erase with your palm and move objects with your finger without having to put the pen down to access other tools. The SMART Board interactive whiteboard automatically switches modes for you.

Network enabled

The projector is network enabled, so it can be connected to your school's IP network to enable commands to be sent or received through the web server or SNMP client.

Theft resistant

The projector is rendered inoperable if removed from the extended control panel or remote, while the Kensington® lock slot and projector padlock loop act as additional visual and physical deterrents.

Easy to maintain

The SMART UF55 projector is filter free, has a lamp life of 2,500 hours in standard mode and 4,000 hours in economy mode, and is resistant to color decay, image degradation and tinting, so the image stays sharp even after years of use.

Comes with SMART Notebook software

The 600i comes with award-winning SMART Notebook software.

Superb image quality

Experience superb image quality with the 600i. The SMART UF55 projector uses BrilliantColor™ technology to produce visuals with true-color quality and high levels of brightness and contrast.

Wide-format option

The system is available in wide format, providing 20 percent more working space.

Multiposition boom

At installation, the SMART UF55 projector and boom can be configured to accommodate multiple room sizes and SMART Board interactive whiteboard models, including the 560, 580, 660, 680 and 685.

Warranty

The interactive whiteboard comes with a five-year warranty upon registration. The SMART UF55 projector has a three-year warranty.

Durable

Durability is built into the SMART Board 600i interactive whiteboard system. The hard-coated polyester surface is tear proof and easily cleaned with any alcohol-free household glass cleaner or disinfected with a diluted bleach solution.
