

SMART Board® 6000 series interactive displays

A new era of classroom collaboration

Made for education

Includes the
SMART Learning Suite

Built to last

50,000 hours* of
uninterrupted lessons

Premium experience

Pen ID™, Object awareness™
4K Ultra HD

A new level of dependability

Never worry about classroom downtime with 50,000 hours* of stunning content quality and reliable service, outlasting typical technology lifecycles. Unlike consumer screens, we've designed our new generation of displays for the classroom. When it's time to replace, the timing is decided by you, when it's right for your school. No more downtime fixing burnt out projector bulbs, no shadows getting in the way, no glare or hot spots, and no faded images.

*Brightness reduced by half

Powered by SMART Learning Suite

SMART Learning Suite includes SMART Notebook® software, SMART amp™ software and SMART Lesson Activity Builder. Together, they connect students, teachers and devices to turn lessons into enriching learning experiences.

Silktouch™ technology

The most accurate, natural, and responsive touch experience from corner-to-corner. Fingers glide effortlessly over the surface, providing hours of error-free use in perfect comfort.

SMART ink™ technology

Writing is natural and looks better with SMART ink. Whether you're using a pen or finger, each stroke is a work of art. Its realistic digital ink improves legibility, so teachers don't have to re-write and students feel confident contributing.

Pen ID™

Students can see their contributions free from interruption by their partner. Using different colored ink, you can write independently and simultaneously in any lesson activity to open new collaborative opportunities.

Object awareness™

You already know how to use it. Offering the most intuitive experience by automatically differentiating between a finger, pen or palm, do what comes naturally. Touch, write, erase. Simplicity at its finest.

4K Ultra HD resolution

Durable commercial-grade, glare-free LED panels display brilliantly detailed 4K Ultra HD images, text and video (3840 x 2160 pixels). Crisp content clarity and readability keeps students involved no matter where they're seated in the room.

Simultaneous touch points

With 4 simultaneous touch points, on Windows or Mac, multiple students can use gestures, like zoom, rotate and flip, at the same time. The natural learning experience develops essential life-long collaboration skills without students realizing it.

Mini PC compatibility

Have the flexibility to equip classrooms and collaboration environments the best way you see fit. There are mounting points for Mini PCs available.
