

# SMART Board® 4000 series interactive flat panels

Tomorrow's technology today

## Made for education

Includes SMART  
Notebook® software

## Built to last

50,000 hours of  
uninterrupted lessons

## Premium experience

8 simultaneous touch points and  
1080p HD resolution

Inspired Collaboration™

SMART®

## A new level of dependability

Never worry about classroom downtime with 50,000\* hours of stunning content quality and reliable service, outlasting typical technology lifecycles. Unlike consumer screens, we've designed our new generation of displays for the classroom. When it's time to replace, the timing is decided by you, when it's right for your school. No more downtime fixing burnt out projector bulbs, no shadows getting in the way, no glare or hot spots, and no faded images.

\*Brightness reduced by half

## Key Features

### Powered by SMART Notebook® software

Included is the software that teaches the world, optimized for use on SMART interactive displays. Create lesson plans in the same environment you'll be teaching on. The world's most popular learning software is made by teachers, for teachers, to inspire students in perfect harmony.

### Silktouch™ technology

The most accurate, natural, and responsive touch experience from corner-to-corner. Fingers glide effortlessly over the surface, providing hours of error-free use in perfect comfort.

### SMART ink™ technology

Writing is natural and looks better with SMART ink. Whether you're using a pen or finger, each stroke is a work of art. Its realistic digital ink improves legibility, so teachers don't have to re-write and students feel confident contributing.

### Brilliant HD resolution

Durable, commercial-grade HD LED panels display brilliantly detailed images in 1080p resolution. The anti-glare surface keeps students involved no matter where they're seated in the room.

### Simultaneous touch points

With 8 simultaneous touch points for Windows, multiple students can use gestures, like zoom, rotate and flip, at the same time. The natural learning experience develops essential life-long collaboration skills without students realizing it.
