SMART Board™ M600
interactive whiteboard®

Dual touch freestyle interaction, intuitive design and control makes it easy for educators to create collaborative learning opportunities.

- Dual user capabilities
- Touch gestures
- Freestyle interaction
- SMART Notebook™ collaborative learning software
- SMART ink™
Choose the projector that best suits your needs

U100  UF70  V30

The ultra-short throw U100 provides clear, dynamic images with 3,600 lumens brightness, is HD-ready with dual HDMI and USB connectivity and comes in two models to support both widescreen and standard interactive whiteboards.

The short-throw UF70 provides 3,000 lumens brightness, is HD-ready with single HDMI connectivity and comes in two models to support both widescreen and standard interactive whiteboards.

The budget-friendly V30 supports standard interactive whiteboards, providing a bright HD image with 3,000 lumens on a short boom.

SMART projectors offer excellent lamp life to reduce classroom downtime and maintenance costs.

Key features:

- **Dual touch capabilities**
  DVIT® technology provides support for two simultaneous touches, making it easy for two students to instantly collaborate, working together at the same time.

- **Freestyle interaction**
  Two students can instantly start working together without having to switch to a multiuser mode or work in confined areas of the surface. Switch naturally from collaborating to interacting with lesson content.

- **Touch gestures**
  A natural touch experience makes it easy for students and teachers to interact with content, writing, erasing and performing mouse functions using a finger or pen. Flick, rotate and zoom using simple hand gestures.

- **SMART Notebook collaborative learning software**
  This software creates engaging interactive lessons, and then saves notes and content from those lessons to share with students. It provides a common platform for linking classroom technologies and student mobile devices.

- **SMART Ink**
  Improve the legibility of your handwriting as you write over applications, websites and videos. The ink becomes an object that you can move and manipulate.

- **Intuitive multiuser pen tray**
  Quick access to ink color sections, on-screen keyboard and help functions, making it easy for teachers to facilitate learning at the interactive whiteboard.

- **Durable surface**
  The low-gloss surface is optimized for projection, ensuring that content can be clearly seen from anywhere in the room. The surface is also easy to clean and is compatible with dry-wipe markers.

- **Projector controls**
  Only available with the SMART M600i system, projector controls are integrated into the pen tray for easy projector management.
