

Quick and easy formative assessment
for use on student devices.

Immediately gauge student understanding

What better way to ensure student success than to instantly see how well they've understood a lesson? SMART response 2 is assessment software that allows you to create a question set to complement your lesson in under 5 minutes. Students answer the questions on their desktop computers, laptops, tablets or phones.

PART OF THE
SMART Learning Suite

SMART lab™

SMART response® 2

SMART amp™

Key Features

It's a simple interface, allowing you to easily **create formative assessments in under five minutes.**

response 2 allows students to respond to questions **using desktop computers, laptops, tablets and phones.**

No training required, seriously. response 2 is that intuitive.

Access response 2 with **one click from SMART Notebook.**

Use your SMART lab questions in response 2 and vice versa.

Results are tabulated immediately, so you instantly know whether students have understood.

Save, edit and **reuse question sets again.**

Set time limits to answer each question.

All students **start assessments at the same time** when you're ready.

Drag and drop images on to questions and answer choices.
