SMART Board® 6000 series
interactive flat panels

ADMINISTRATOR’S GUIDE
FOR MODELS SPNL-6055 AND SPNL-6065
Product registration

If you register your SMART product, we’ll notify you of new features and software upgrades.

Register online at smarttech.com/registration.

Keep the following information available in case you need to contact SMART Support.

Serial number: ______________________________________________________________

Date of purchase: ____________________________________________________________

Licenses
The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Trademark notice
SMART Board, SMART Ink, SMART Notebook, DViT, smarttech, the SMART logo and all SMART taglines are trademarks or registered trademarks of SMART Technologies ULC in the U.S. and/or other countries. All third-party product and company names may be trademarks of their respective owners.

Copyright notice

No part of this publication may be reproduced, transmitted, transcribed, stored in a retrieval system or translated into any language in any form by any means without the prior written consent of SMART Technologies ULC. Information in this manual is subject to change without notice and does not represent a commitment on the part of SMART.

This product and/or use thereof covered by one or more of the following U.S. patents:
www.smarttech.com/patents

01/2015
Important information

**WARNING**

- Failure to follow the installation instructions shipped with your SMART product could result in personal injury and product damage which may not be covered by your warranty.

- Do not open or disassemble the SMART product. You risk electrical shock from the high voltage inside the casing. Opening the casing also voids your warranty.

- Do not stand (or allow children to stand) on a chair to touch the surface of your SMART product. Rather, mount the product at the appropriate height.

- To reduce the risk of fire or electric shock, do not expose the SMART product to rain or moisture.

- If your SMART product requires replacement parts, make sure the service technician uses replacement parts specified by SMART Technologies or parts with the same characteristics as the original.

- Ensure that any cables extending across the floor to your SMART product are properly bundled and marked to avoid a trip hazard.

- Do not insert objects inside the cabinet ventilation holes, because they could touch dangerous voltage points and cause electric shock, fire or product damage which may not be covered by your warranty.

- Do not place any heavy objects on the power cable. Damage to the cable could cause shock, fire or product damage which may not be covered by your warranty.

- Use only extension cords and outlets into which this product’s polarized plug can be fully inserted.

- Use the power cable provided with this product. If a power cable is not supplied with this product, please contact your supplier. Use only power cables that match the AC voltage of the power outlet and that comply with your country’s safety standards.

- If the glass is broken, do not touch the liquid crystal. To prevent injury, handle glass fragments with care when disposing of them.

- Do not move or mount the interactive flat panel by connecting rope or wire to its handles. Because the interactive flat panel is heavy, rope, wire or handle failure could lead to personal injury.
Use only VESA®-approved mounting hardware.

Disconnect all power cables for your interactive flat panel from the wall outlet and seek assistance from qualified service personnel when any of the following occurs:

- The power cable or plug is damaged
- Liquid is spilled into the interactive flat panel
- Objects fall into the interactive flat panel
- The interactive flat panel is dropped
- Structural damage such as cracking occurs
- The interactive flat panel behaves unexpectedly when you follow operating instructions

**CAUTION**

- Before you clean your SMART product, shut down or disconnect the computer. Otherwise, you may scramble the desktop icons or inadvertently activate applications when you wipe the screen.

- Avoid setting up and using the SMART product in an area with excessive levels of dust, humidity and smoke.

- Make sure an electrical socket is near your SMART product and remains easily accessible during use.

- The external power supply needs to meet the Limited Power Source (LPS) requirements of CSA/UL/IEC/EN 60950-1, when required.

- This SMART product should be used only with European TN and TT power distribution systems.

It is not suitable for older, IT-type power distribution systems found in some European countries. “This system (IT-type) is widely used isolated from earth, in some installations in France, with impedance to earth, at 230/400V, and in Norway, with voltage limiter, neutral not distributed, at 230V line-to-line.” (IEC 60950:1999)

Contact qualified personnel if you’re uncertain of the type of power system available where you’re installing your SMART product.

- You must connect the USB cable that came with your interactive flat panel to a computer that has a USB compliant interface and that bears the USB logo. In addition, the USB source computer must be compliant with CSA/UL/EN 60950 and bear the CE mark and CSA and/or UL Mark(s) for CSA/UL 60950. This is for operating safety and to avoid damage to the interactive flat panel.
The following are the power requirements for your interactive flat panel:

<table>
<thead>
<tr>
<th>Model</th>
<th>Power requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPNL-6055</td>
<td>90V to 240V AC, 50Hz to 60 Hz, 122 W</td>
</tr>
<tr>
<td>SPNL-6065</td>
<td>100V to 240V AC, 50 Hz to 60 Hz, 190 W</td>
</tr>
</tbody>
</table>

For additional requirements and other information, refer to your interactive flat panel's specifications (see Resources for decision makers on page 7).

This chapter introduces you to your SMART Board® interactive flat panel and this guide.

About this guide
This guide explains how to set up and maintain your interactive flat panel. It includes the following information:

- How to mount your interactive flat panel
- How to connect power and devices
- How to set up your interactive flat panel
- How to maintain your interactive flat panel for years of use
- How to troubleshoot issues with your interactive flat panel
In addition, this guide includes information on your interactive flat panel's on-screen display menu and remote management support.

This guide is intended for individuals who are responsible for installing and maintaining interactive flat panels in their organizations. Other documentation and resources are available for individuals who use interactive flat panels.

About your interactive flat panel
Your SMART Board® interactive flat panel features SMART's proprietary DVIT® (Digital Vision Touch) technology on an LCD screen with e-LED backlight.

Models
The SMART Board 6000 series interactive flat panels consists of two models:

- SMART Board 6055 interactive flat panel
- SMART Board 6065 interactive flat panel

Differences between these models are noted in this guide.

Features
Your interactive flat panel includes the following features:

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Touch support</td>
<td>You can do everything on your interactive flat panel that you can do at your computer—open and close applications, meet with others, create new documents or edit existing ones, visit websites, play and manipulate videos, and so on—by touching the interactive flat panel's surface. You can use an array of gestures within applications, including panning, scaling, rotating and zooming in and out. The interactive flat panel's support for at least four simultaneous touches enables you and other users to interact with objects on the screen at the same time.</td>
</tr>
<tr>
<td>Writing and drawing support</td>
<td>You can write over any application in digital ink using one of the supplied pens, and then erase the digital ink using the eraser on the pen or your palm. You and another writer can write or draw digital ink on the screen at the same time. The Pen ID feature enables you to assign different ink appearances to each pen.</td>
</tr>
<tr>
<td>Audio support</td>
<td>Your interactive flat panel includes integrated speakers for presenting audio from connected input sources.</td>
</tr>
</tbody>
</table>
Components
Your interactive flat panel consists of the following components:

<table>
<thead>
<tr>
<th>No.</th>
<th>Name</th>
<th>More Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Screen</td>
<td>Page 3</td>
</tr>
<tr>
<td>2</td>
<td>Cameras and reflective tape channel</td>
<td>Page 4</td>
</tr>
<tr>
<td>3</td>
<td>Front control panel</td>
<td>Page 4</td>
</tr>
<tr>
<td>4</td>
<td>Pen with eraser (×2)</td>
<td>Page 5</td>
</tr>
<tr>
<td>5</td>
<td>Speakers</td>
<td>Page 5</td>
</tr>
<tr>
<td>6</td>
<td>Connector panel</td>
<td>Page 13</td>
</tr>
<tr>
<td>7</td>
<td>Menu control panel</td>
<td>Page 35</td>
</tr>
</tbody>
</table>

Screen
The screen specifications vary by model:

<table>
<thead>
<tr>
<th>Models</th>
<th>Diagonal</th>
<th>Width</th>
<th>Height</th>
<th>Aspect ratio</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPNL-6055</td>
<td>54 1/2&quot;</td>
<td>47 5/8&quot;</td>
<td>26 3/4&quot;</td>
<td>16:9</td>
</tr>
<tr>
<td></td>
<td>(138.4 cm)</td>
<td>(121 cm)</td>
<td>(68 cm)</td>
<td></td>
</tr>
<tr>
<td>SPNL-6065</td>
<td>64 1/2&quot;</td>
<td>56 1/4&quot;</td>
<td>31 5/8&quot;</td>
<td>16:9</td>
</tr>
<tr>
<td></td>
<td>(163.9 cm)</td>
<td>(142.8 cm)</td>
<td>(80.4 cm)</td>
<td></td>
</tr>
</tbody>
</table>

For information on cleaning the screen, see Cleaning the screen on page 25.
Cameras and reflective tape channel
In the corners of the screen, there are cameras that track finger and pen positions across the screen. The screen is bordered by a channel that contains reflective tape.

For information on cleaning the camera windows and reflective tape, see Cleaning the screen on page 25.

⚠️ CAUTION
- Keep the reflective tape dry.
- Do not remove or damage the reflective tape.

⚠️ IMPORTANT
- Do not attach items such as adhesive notes to the screen because they will interfere with the cameras.
- Do not place anything in the channel because it will interfere with the cameras.

Front control panel
The front control panel contains the Standby, Input Select, Mute and volume control buttons.

<table>
<thead>
<tr>
<th>No.</th>
<th>Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Standby button</td>
</tr>
<tr>
<td>2</td>
<td>Input Select button</td>
</tr>
<tr>
<td>3</td>
<td>Mute button</td>
</tr>
<tr>
<td>4</td>
<td>Volume decrease</td>
</tr>
<tr>
<td>5</td>
<td>Volume increase</td>
</tr>
</tbody>
</table>

⚠️ IMPORTANT
If there is a film over the front control panel, remove the film before using the front control panel.

In normal operation, all buttons are white.
The Standby button also functions as an indicator light:

<table>
<thead>
<tr>
<th>Indicator light</th>
<th>Interactive flat panel status</th>
<th>Troubleshooting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Not receiving power</td>
<td>Confirm the interactive flat panel’s power cable is connected to the power outlet (see page 14). Flick the power switch to the ON (I) position (see page 17).</td>
</tr>
<tr>
<td>Solid amber</td>
<td>DPMS (power management) mode</td>
<td>Press the Standby button ⊕ to exit DPMS mode.</td>
</tr>
<tr>
<td>Slowly flashing amber</td>
<td>Standby mode</td>
<td>Press the Standby button ⊕ to exit Standby mode.</td>
</tr>
<tr>
<td>Flashing amber</td>
<td>No USB connection from the connected computer</td>
<td>Verify your connections (see page 14).</td>
</tr>
<tr>
<td>Slowly flashing white</td>
<td>SMART Board service not running on the connected computer</td>
<td>Ensure that SMART Product Drivers is installed and that the SMART Board service is running.</td>
</tr>
<tr>
<td>Solid white</td>
<td>Normal operation</td>
<td>[N/A]</td>
</tr>
</tbody>
</table>

**Pens with erasers**

Your interactive flat panel comes with two pens with erasers attached.

The bottom bezel of the interactive flat panel includes magnetic holders for the pens. Removing a pen from the holders activates it and enables you to either draw or erase digital ink.

⚠️ **CAUTION**

When returning the pen to the magnetic holder, ensure that it is centered in its holder to prevent it from falling and potentially being damaged.

**Speakers**

Your interactive flat panel includes two 10 W integrated side firing speakers.

You can connect external speakers if desired (see Connecting external speakers on page 15).
About SMART software

You can install the following SMART software on the computers connected to your interactive flat panel to take full advantage of the interactive flat panel’s features:

<table>
<thead>
<tr>
<th>Software</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SMART Product Drivers</td>
<td>SMART Product Drivers enables connected computers to detect input from your interactive flat panel.</td>
</tr>
<tr>
<td>SMART Ink™</td>
<td>SMART Ink enables you to write and draw in digital ink over open applications, files, folders, websites and any other open window on your computer. When you write outside the open windows on your computer, a SMART Ink Note appears and you can write inside the note. When you open an application that has its own ink tools, you can turn off SMART Ink, and then use the application's ink tools to write in the content.</td>
</tr>
<tr>
<td>SMART Notebook® collaborative learning software</td>
<td>SMART Notebook software enables you to use your interactive flat panel in a classroom.</td>
</tr>
</tbody>
</table>

Resources for administrators

In addition to this guide, there are other resources for administrators.

Training

The SMART training website (smarttech.com/training) includes an extensive library of training resources you can refer to when learning how to set up and maintain your interactive flat panel.

Support center and knowledge base

The Support center (smarttech.com/support) contains a library of documents, including this guide, and a knowledge base that you can search when troubleshooting issues.
Resources for others
SMART provides resources for decision makers, installers and users as well as administrators.

Resources for decision makers
Decision makers can refer to the specifications for detailed information on the interactive flat panels.

<table>
<thead>
<tr>
<th>Interactive flat panel</th>
<th>Specifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>SMART Board 6055 interactive flat panel</td>
<td>smarttech.com/kb/170817</td>
</tr>
<tr>
<td>SMART Board 6065 interactive flat panel</td>
<td>smarttech.com/kb/170640</td>
</tr>
</tbody>
</table>

Resources for installers
Installers can refer to the installation instructions included with your interactive flat panel when installing the product. If installers have misplaced these installation instructions, they can download a PDF version from smarttech.com/kb/170641.

Resources for users
Users can refer to the SMART Notebook software Help for information on using the software with the interactive flat panel. To open the Help, users can select Help > Contents in the SMART Notebook software window.
Chapter 2
Mounting your interactive flat panel

Before mounting your interactive flat panel ............................................................... 9
Choosing a location .................................................................................................... 10
Choosing a height ....................................................................................................... 11

To mount your interactive flat panel on a wall, you require a team of professional installers.
This chapter is intended for installers. Installers should read this chapter along with the installation instructions included with the interactive flat panel before they mount the interactive flat panel.

WARNING
Improper mounting of your interactive flat panel can result in personal injury and product damage.

Before mounting your interactive flat panel

Do the following before mounting your interactive flat panel:

- Review the environmental requirements in the interactive flat panel’s specifications (see Resources for decision makers on page 7).
- Save all product packaging so that it’s available if you need to transport the interactive flat panel. If the original packaging isn’t available, you can purchase new product packaging from your authorized SMART reseller (smarttech.com/where).
- Refer to local building codes to ensure the wall can support the weight of the interactive flat panel specified in the following table and mounting equipment.

<table>
<thead>
<tr>
<th>Model</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPNL-6055</td>
<td>104 lb. (47.4 kg)</td>
</tr>
<tr>
<td>SPNL-6065</td>
<td>135 lb. 6 oz. (61.4 kg)</td>
</tr>
</tbody>
</table>
- Use a standard VESA 400 mm × 400 mm mounting plate (not included) to mount the interactive flat panel on a wall.
Use M8 screws to fasten the wall bracket.

- **Screw length**: $20 \text{ mm} + x \text{ mm} < M8 < 45 \text{ mm} + x \text{ mm}$
  
  where $x$ is the total thickness of the wall bracket and washer

- **Fasten force**: $97.36–177.01 \text{ in-lb. (11–20 N-m)}$

  **CAUTION**
  Do not over-tighten the screws.

**NOTE**

SMART recommends M8 $\times$ 30 mm mounting screws for standard installations where the total wall mount bracket and washer thickness is less than 7 mm.

Because the receptacles might not be easily accessible after the installers mount the interactive flat panel, consider connecting cables for power, computers and other devices while the interactive flat panel is still in its packaging (see *Connecting power and devices* on page 13).

Before turning on the interactive flat panel for the first time, clean the camera windows and reflective tape following the instructions in *Cleaning the camera windows and reflective tape* on page 26.

**Choosing a location**

Do the following when choosing a location for the interactive flat panel:

- Do not install the interactive flat panel in a location where a door or gate could hit it.

- Do not install the interactive flat panel in an area where it will be subjected to strong vibrations or dust.

- Choose a location that’s far from bright light sources, such as windows and strong overhead lighting. IR lighting can cause issues with the performance of the cameras and can lead to unintentional or missed touches.

- Do not install the interactive flat panel near where the main power supply enters the building.

- Ensure adequate ventilation or provide air conditioning around the interactive flat panel so that heat can flow away from the unit and the mounting equipment.

- If you mount the interactive flat panel in a recessed area, leave at least 4" (10 cm) of space between the interactive flat panel and the recessed walls to enable ventilation and cooling.
Choosing a height
Consider the general height of the user community when you choose the height for the interactive flat panel.
Chapter 3

Connecting power and devices

This chapter includes information on connecting your interactive flat panel to power, computers and other devices.

Connector panel

The following diagram and table present the connectors on the interactive flat panel:

<table>
<thead>
<tr>
<th>No.</th>
<th>Connector</th>
<th>Connects to</th>
<th>Notes (if any)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>RS-232</td>
<td>Room control system</td>
<td>See page 39.</td>
</tr>
<tr>
<td>2</td>
<td>USB Micro-B</td>
<td>[N/A]</td>
<td>This connector is a service port.</td>
</tr>
<tr>
<td>3</td>
<td>Stereo 3.5 mm</td>
<td>External speakers</td>
<td>See page 15.</td>
</tr>
<tr>
<td>4</td>
<td>USB Type-B</td>
<td>Room computer (data)</td>
<td>See page 14.</td>
</tr>
</tbody>
</table>
Connecting power
Connect the supplied power cable from the AC power inlet on the bottom of the interactive flat panel to a power outlet.

**NOTE**
Refer to your interactive flat panel’s specifications for power requirements and power consumption information (see Resources for decision makers on page 7).

Connecting the room computer
Using USB and HDMI cables, connect the room computer to the appropriate connectors on the interactive flat panel.

**NOTES**
- You can use the interactive flat panel with up to two USB-XT extenders.
- If you use a CAT 5 USB extender, the maximum length of the Cat 5 cable is 52’ (16 m).

Press the Input Select button on the front control panel until the input source is HDMI.
CHAPTER 3
CONNECTING POWER AND DEVICES

Connecting external speakers

Your interactive flat panel includes two 10 W speakers. However, you can connect external active speakers using the stereo 3.5 mm connector.
Chapter 4
Setting up your interactive flat panel and the room computer

This chapter explains how to set up your interactive flat panel and the room computer after mounting your interactive flat panel and connecting power and devices.

Turning on your interactive flat panel and the room computer for the first time
After connecting the room computer to the interactive flat panel (see Connecting the room computer on page 14) and mounting the interactive flat panel (see Mounting your interactive flat panel on page 9), you can turn on both devices.

To turn on your interactive flat panel and the room computer for the first time
1. Turn on the room computer.
2. Turn on your interactive flat panel by flicking the power switch beside the AC power inlet to the ON (I) position.
3. Press the Standby button on the front control panel.
CHAPTER 4
SETTING UP YOUR INTERACTIVE FLAT PANEL AND THE ROOM COMPUTER

Installing SMART software
To take full advantage of your interactive flat panel’s features, you must download and install SMART software on the room computer.

The purchase of your interactive flat panel includes a license for SMART Notebook software and a one-year subscription to the SMART Notebook Advantage software maintenance plan. See smarttech.com/notebook for more information.

TIP
You can also install SMART Notebook software from the DVD included with your interactive flat panel.

To download and install SMART software
1. Go to smarttech.com/downloads.
2. Scroll to the SMART Notebook software section.
3. Click Choose a version, and then select the most recent version.
4. Click Download.
5. Follow the on-screen instructions to save the installer to a temporary location.
6. Double-click the installer.
7. Follow the on-screen instructions to install SMART software.
Running the connection wizard

After turning on your interactive flat panel and the room computer for the first time and installing SMART software, run the connection wizard to orient the interactive flat panel.

To run the connection wizard

1. Access the SMART Connection Wizard by opening SMART Settings (see Opening SMART Settings on page 22).
2. Press Connection Wizard.
   The SMART Connection Wizard appears.
3. Select the interactive flat panel from the list of connected SMART interactive products, and then press Next.
4. Select Product is being set up for the first time, and then press Next.
5. Follow the on-screen instructions to orient the interactive flat panel for the first time.
Chapter 5

  Removing your interactive flat panel ........................................................... 27
  Transporting your interactive flat panel ...................................................... 28

This chapter includes common maintenance procedures for your interactive flat panel.

Resetting your interactive flat panel
You can reset your interactive flat panel using the front control panel.

To reset your interactive flat panel
1. Press the **Standby** button 🍖 on the front control panel.
   
   A message appears on the screen, prompting you to either press the button again to enter Standby mode or press and hold the button to reset the interactive flat panel.
2. Press and hold the **Standby** button until the screen turns black.

   The interactive flat panel resets and then your computer's logon screen or desktop appears on your interactive flat panel.

### Maintaining your interactive flat panel software and firmware

This section includes common maintenance procedures for your interactive flat panel software and firmware.

#### Opening SMART Settings

Several maintenance and troubleshooting procedures in this guide require you to open SMART Settings.

- **To open SMART Settings on Windows 7 operating system**
  
  Select **Start > All Programs > SMART Technologies > SMART Tools > SMART Settings**.

  SMART Settings appears.

- **To open SMART Settings on Windows 8 operating system**
  
  1. Open the *Apps* screen.
  2. Press **SMART Settings**.

  SMART Settings appears.

- **To open SMART Settings on Mac OS operating system software**
  
  1. Press the **SMART Board** icon on the Mac menu bar.
  2. Press **SMART Settings**.

  SMART Settings appears.

#### Updating firmware

Your interactive flat panel uses firmware on its processor. You can update the firmware. For more information, see *Updating the firmware on your SMART Board 6065 interactive flat panel* (knowledgebase.force.com/?q=000015055).
Updating software
SMART Product Update (SPU) is included in the SMART software you installed to use your interactive flat panel (see Installing SMART software on page 18). SPU periodically checks for updates to the SMART software posted on the SMART website. You can configure SPU to prompt users to install updates or to install updates automatically.

NOTE
If you didn’t install SPU, you can download updates to SMART software from smarttech.com/downloads.

Orienting your interactive flat panel
If the location of your touch is misinterpreted (the pointer appears a distance from the actual contact), orient your interactive flat panel.

NOTE
You can use your finger or an interactive flat panel pen to orient your interactive flat panel.

To orient the interactive flat panel
1. Open SMART Settings (see Opening SMART Settings on the previous page).
2. Press Orient.
3. Press the red targets as they appear. Hold your finger or the tip of the pen at the center of each target, and then lift the pen or finger. When you lift the pen or finger, the target moves to the next orientation point.

IMPORTANT
Hold the pen perpendicular to the screen.

4. Continue until you’ve pressed all the targets.
   The orientation window closes.

5. If this doesn’t correct inaccurate touch, calibrate your interactive flat panel (see Calibrating your interactive flat panel on the next page).
Calibrating your interactive flat panel
Digital cameras in the corners of the interactive flat panel track the position of the pens, eraser and your finger on the interactive surface, and then send the information to the SMART software, which interprets this information as mouse clicks, digital ink or ink removal in the appropriate location. Calibration determines the position and angles of the cameras to accurately identify the location of touches on your interactive flat panel.

IMPORTANT
If an error message appears while you are calibrating your interactive flat panel, contact SMART Support (smarttech.com/contactsupport).

To calibrate your interactive flat panel
1. Open SMART Settings (see Opening SMART Settings on page 22).
2. Press SMART Hardware Settings.
3. If you have more than one SMART product connected, select the interactive flat panel.
4. Select Advanced Settings from the drop-down list.
5. Press Calibrate.
   The calibration screen appears. This can take a few moments.
6. Press the red target with the tip of an interactive flat panel pen. Hold the tip at the center of the target until the target turns green, and then lift the pen.
   The target moves to the next location.

NOTE
You can calibrate a target again by pressing the LEFT ARROW key on your keyboard.

7. Continue pressing targets until the second calibration screen and a grid appears.
   An example appears briefly to demonstrate how to draw across the screen to calibrate the interactive surface.
8. Use a pen to draw a spiral horizontally across the grid. As you draw, the ink is blue. As you complete each square, the square becomes green.
9. When all the squares are green, a progress bar appears.
   When the progress bar is full, the interactive flat panel displays the message Calibration successful.
10. Orient your interactive flat panel (see Orienting your interactive flat panel on the previous page).
Maintaining your interactive flat panel hardware

If you properly maintain your interactive flat panel hardware, it will provide years of use.

Checking the interactive flat panel installation

Inspect your interactive flat panel installation frequently to ensure that it remains securely installed.

- Check the mounting location for signs of damage or weakness that can occur over time.
- Check for loose screws, gaps, distortions or other issues that could occur with the mounting apparatus.

If you find an issue, contact a professional installer.

Cleaning the screen

Follow these instructions to clean the interactive flat panel screen without damaging its anti-glare coating or other product components.

**CAUTION**

- Do not use permanent or dry-erase markers on the screen. If dry-erase markers are used on the screen, remove the ink as soon as possible with a lint-free, non-abrasive cloth.
- Do not rub the screen with a dense or rough material.
- Do not apply pressure to the screen.
- Do not use cleaning solution or glass cleaner on the interactive flat panel screen, because they can deteriorate or discolor the screen.
- Avoid touching the reflective tape between the screen and the bezel, and ensure that this strip stays dry. Damage to this strip affects touch interactivity.

**To clean the screen**

1. Turn off the room computer.
2. Press the Standby button on the front control panel twice.
3. Flick the power switch beside the AC power inlet.
4. Wipe the screen with a lint-free, non-abrasive cloth.
Cleaning the camera windows and reflective tape

The DViT technology in your interactive flat panel uses four cameras in the corners of the frame and the reflective material between the screen and the bezels. Excessive dust buildup on the camera windows or reflective tape can impair touch performance.

These areas should be inspected regularly for dust and should be cleaned if any obvious dust buildup has occurred.

⚠️ CAUTION
- Do not use compressed air to clean the camera windows or borders.
- Do not use water, chemicals or cleaning agents.
- Applying too much pressure when cleaning the tape or cameras can damage the tape and cause performance issues or errors.

To clean the camera windows and reflective tape

1. With a clean lint-free cloth, gently wipe the camera windows in the top corners and the reflective tape along the top of your interactive flat panel screen using the cloth.
2. Gently wipe the reflective tape along the sides of your interactive flat panel screen.
3. Gently wipe the camera windows in the bottom corners and the reflective strip across the bottom of your interactive flat panel screen.

Maintaining ventilation

Your interactive flat panel requires ventilation to function. Dust buildup in the ventilation holes compromises cooling and leads to product failure.

- Clean accessible ventilation holes monthly with a dry cloth.
- Use a vacuum cleaner with a narrow hose end fitting to clear the back ventilation holes regularly. You might have to remove the interactive flat panel from your wall. For more information on removing your interactive flat panel see Removing your interactive flat panel on the next page.

⚠️ CAUTION
Avoid setting up or using your interactive flat panel in an area with excessive levels of dust, humidity or smoke.
CHAPTER 5
MAINTAINING YOUR INTERACTIVE FLAT PANEL

Preventing condensation
Your interactive flat panel screen contains layers of glass that can collect condensation, especially in the following conditions:

- Temperature extremes with high humidity
- Rapid changes in humidity, which can occur when you operate the product near water, such as a pool, kettle or air conditioner ventilator
- Direct exposure to sunlight

To evaporate condensation from your interactive flat panel
1. Remove the humidity source from the interactive flat panel, if possible.
2. Turn off the interactive flat panel.
3. Remove any moisture from the interactive flat panel with a smooth, dry cloth.
4. Leave the interactive flat panel turned off for 48 hours.

Maintaining pens
To prevent damage to your interactive flat panels’ anti-glare coating, replace a pen if its nib becomes worn. You can purchase replacement pens from the Store for SMART Parts (see smarttech.com/Support/PartsStore).

Removing and transporting your interactive flat panel
On occasion, you might need to remove your interactive flat panel from its current location and transport it to another location.

Removing your interactive flat panel
To safely remove your interactive flat panel, use two or more professional installers.

**WARNING**
- Do not attempt to move the interactive flat panel using your own strength. The interactive flat panel is very heavy.
- Do not move the interactive flat panel by connecting a rope or wire to the handles on the back. The interactive flat panel can fall and cause personal injury and product damage.
To remove your interactive flat panel

1. Turn off the room computer.
2. Press the Standby button on the front control panel twice.
3. Flick the power switch beside the AC power inlet.
4. Remove all accessible cables and connectors.
5. Lift your interactive flat panel from its mounting location.

**WARNING**
Do not place the interactive flat panel on a sloping or unstable cart, stand or table, because the interactive flat panel could fall, resulting in injury and severe product damage.

**CAUTION**
Do not leave the interactive flat panel face up, face down or upside down for an extended period of time, because it could cause permanent damage to the screen.

6. Remove the mounting brackets.

Transporting your interactive flat panel
Save your original packaging so that you can repack your interactive flat panel with as much of the original packaging as possible. This packaging was designed with optimal shock and vibration protection. If your original packaging isn’t available, you can purchase the same packaging directly from your authorized SMART reseller (smarttech.com/where).

**CAUTION**
Transport your interactive flat panel only in original or replaced packaging. Transporting your interactive flat panel without correct packaging voids your warranty and could lead to product damage.
This chapter provides you with the information necessary to solve simple issues that can occur with your interactive flat panel. If issues persist, or aren't covered in this chapter, contact SMART Support (smarttech.com/contactsupport).

Locating the interactive flat panel serial number
When you contact SMART Support, you might be asked to provide the interactive flat panel serial number. The serial number is located in two places:

- The on-screen display menu (see Serial Number on page 38)
- Underneath the bottom bezel

Resolving common issues using the indicator light
The Standby button on the front control panel also functions as an indicator light. You can use the indicator light to resolve common issues with the interactive flat panel. For more information, see Front control panel on page 4.
Resolving image issues
Use the following table to resolve image issues:

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The image is too light, too dark or has poor image quality.</td>
<td>Your interactive flat panel's picture settings might be set incorrectly.</td>
<td>Adjust the Picture options (see Picture on page 36).</td>
</tr>
<tr>
<td>There is a persistent image on the screen.</td>
<td>An image was displayed for too long.</td>
<td>• Turn off your interactive flat panel and leave it turned off for as long as the image was on the screen. • Set up screen savers on any connected computers to prevent persistent images.</td>
</tr>
<tr>
<td>There are other image issues.</td>
<td></td>
<td>Return all on-screen display menu settings to their default values (see page 38).</td>
</tr>
</tbody>
</table>

Resolving touch issues
Use the following table to resolve touch issues:

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>When you touch the screen, the pointer appears in the wrong location.</td>
<td>You aren't touching the screen at a right angle.</td>
<td>For more information, see Touching and drawing on your SMART Board interactive whiteboard is inaccurate (knowledgebase.force.com/?q=000013976).</td>
</tr>
<tr>
<td></td>
<td>Your interactive flat panel isn't oriented.</td>
<td>Orient your interactive flat panel (see page 23.)</td>
</tr>
<tr>
<td>An area of the screen doesn't respond to your touch or when you draw digital ink, the lines are broken.</td>
<td>Something is blocking the cameras.</td>
<td>Ensure nothing is taped to the screen.</td>
</tr>
<tr>
<td></td>
<td>Something is on the reflective tape channel.</td>
<td>Remove items from the reflective tape channel.</td>
</tr>
<tr>
<td></td>
<td>Your finger or pen is skipping as you draw. This is most common on the upstroke.</td>
<td>Use consistent pressure while drawing digital ink.</td>
</tr>
<tr>
<td></td>
<td>Bright lights are interfering with the cameras.</td>
<td>Close blinds or shades or dim all halogen lights and LEDs.</td>
</tr>
<tr>
<td></td>
<td>Your cameras require calibration, possibly because of a temperature change in the room.</td>
<td>Calibrate your interactive flat panel (see page 24).</td>
</tr>
</tbody>
</table>
Resolving connected computer issues

Use the following table to resolve connected computer issues:

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The connected computer’s display is too large, too small or doesn’t</td>
<td>The connected computer’s video resolution settings don’t match your</td>
<td>• The native resolution is 3840 × 2160 at 30 Hz.</td>
</tr>
<tr>
<td>completely fill the screen.</td>
<td>interactive flat panel’s native resolution.</td>
<td>• If the connected computer can’t support the above resolution, consider 1920 × 1080 at 60 Hz as an alternative.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The connected computer’s screen resolution is correct, but the image</td>
<td>The connected computer’s video card is underscanning the image.</td>
<td>• Turn off or adjust the overscan/underscan feature in the video card driver software until the image fits the screen resolution. Refer to the computer’s video card Help for more information.</td>
</tr>
<tr>
<td>is surrounded by black bars.</td>
<td></td>
<td>• Select the 4K UHD option from the video card driver’s advanced menu (if available). This should provide a pixel-perfect image for your interactive flat panel.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>You have a poor quality video cable.</td>
<td>Replace the video cable with a better quality video cable.</td>
<td></td>
</tr>
<tr>
<td>You connected two video cables together.</td>
<td>Replace your two cables with one longer cable.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>OR</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Move the computer so that it’s within a single cable length of your</td>
<td></td>
</tr>
<tr>
<td></td>
<td>interactive flat panel.</td>
<td></td>
</tr>
<tr>
<td>The interactive flat panel’s native resolution doesn’t match the</td>
<td>Check the resolution on the computer’s display adapter and change your</td>
<td></td>
</tr>
<tr>
<td>resolution on the computer’s display adapter.</td>
<td>interactive flat panel’s resolution to match.</td>
<td></td>
</tr>
<tr>
<td>The connected computer’s display is unstable or unfocused.</td>
<td>The video connection is loose.</td>
<td>Secure the video cable to both the computer and your interactive flat panel.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>You have a poor quality video cable.</td>
<td>Replace the video cable with a better quality video cable.</td>
<td></td>
</tr>
<tr>
<td>You connected two video cables together.</td>
<td>Replace your two cables with one longer cable.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>OR</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Move the computer so that it’s within a single cable length of your</td>
<td></td>
</tr>
<tr>
<td></td>
<td>interactive flat panel.</td>
<td></td>
</tr>
<tr>
<td>The connected computer’s video display card is defective.</td>
<td>Connect a different computer to your interactive flat panel. If this improves the image quality, consider replacing the video card in the original computer.</td>
<td></td>
</tr>
</tbody>
</table>
### Using the SMART Connection Wizard

You can resolve a variety of issues using the SMART Connection Wizard found in SMART Settings.

#### To use the SMART Connection Wizard

1. Access the SMART Connection Wizard by opening SMART Settings (see *Opening SMART Settings* on page 22).

2. Press *Connection Wizard*.

   The *SMART Connection Wizard* appears.

3. Select your interactive flat panel from the list of connected SMART interactive products, and then press *Next*.
4. Select the option that best describes the issue you're encountering, and follow the on-screen instructions to troubleshoot your interactive flat panel.

Using SMART Board Diagnostics
If you touch the interactive flat panel’s surface and nothing happens, or if there is no digital ink or the ink appears in some locations and not in others, use SMART Board Diagnostics to help identify and resolve these issues.

**IMPORTANT**
Do not change diagnostic settings unless asked to do so by SMART Support.

**To check camera views**
1. Open SMART Settings (see Opening SMART Settings on page 22).
   SMART Board Diagnostics opens.
3. Select View > SPNL-6000/SBID8000-G5 Bar.
   The group box appears.
4. Press View.
   The camera view screen appears.
5. Click Get image to display the four camera views. This could take a few moments.
   If one of the camera views doesn't appear, the camera is blocked or can't locate the reflective tape on the interactive flat panel's inner frame.

**NOTE**
You can compare the camera view to examples of normal camera views.

6. Check the camera lens and ensure that nothing is blocking its view and that nothing is affixed to the interactive surface.
Appendix A

Using the on-screen display menu

Changing settings in the on-screen display menu ................................................................. 35
On-screen display menu options .................................................................................................. 36

You can access the on-screen display menu using the menu control panel located on the side of the interactive flat panel.

<table>
<thead>
<tr>
<th>No.</th>
<th>Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>MENU</td>
</tr>
<tr>
<td>2</td>
<td>SET</td>
</tr>
<tr>
<td>3</td>
<td>[Up]</td>
</tr>
<tr>
<td>4</td>
<td>[Down]</td>
</tr>
<tr>
<td>5</td>
<td>[Left]</td>
</tr>
<tr>
<td>6</td>
<td>[Right]</td>
</tr>
</tbody>
</table>

Changing settings in the on-screen display menu

To change settings in the on-screen display menu

1. Press the MENU button on the menu control panel.
   The on-screen display menu appears.
2. Press the up and down arrows to highlight a menu, and then press SET.
3. Press the up and down arrows to highlight a menu option.
4. Press the left and right arrows to change the menu option’s setting.

OR

Press the right arrow to open the menu option’s submenu. (Repeat steps 3 and 4 to change settings in the submenu.)

5. Press **MENU** until the on-screen menu closes.

### On-screen display menu options

<table>
<thead>
<tr>
<th>Option</th>

This appendix includes detailed instructions on how to set up your computer or room control system to remotely manage your interactive flat panel using an RS-232 serial interface.

Connecting and configuring a room control system

Connect a computer to the room control input on the interactive flat panel to remotely select video inputs, turn on or turn off the interactive flat panel and request information such as contrast, power state and current settings.
Connecting a computer to an interactive flat panel

To connect a computer to the interactive flat panel

Connect an RS-232 cable from the serial output on the computer to the room control input on the connector panel.

![RS-232 cable connection diagram]

**IMPORTANT**

Do not use a null modem cable. Use only a standard RS-232 cable.

Configuring the computer’s serial interface settings

You need to configure the computer’s serial interface before sending commands.

To configure the computer’s serial interface

1. Turn on the interactive flat panel.
2. Turn on the computer, and then start the serial communications program or terminal emulation program.
3. Activate local echo.
4. Configure the serial interface settings using the following values, and then press ENTER.
   - Baud rate: 19200
   - Data length: 8
   - Parity bit: None
   - Stop bit: 1

A command prompt (>) appears on the following line.

**NOTE**

If no message appears or an error message appears, the serial interface configuration isn’t correct. Repeat steps 3 and 4.

5. Type commands to configure the interactive flat panel.
Power modes
An interactive flat panel has three distinct power modes:

- On
- Power Save
- Standby

All commands are available when the interactive flat panel is on. Some commands are available when the interactive flat panel is in Standby mode.

Room control system programming commands and responses
To access interactive flat panel information or to adjust interactive flat panel settings using the room control system, type commands after the command prompt (>), and then wait for the response from the interactive flat panel.

CORRECT

```
>get contrast
contrast=55
```

If you type a command that the room control system doesn’t recognize, you receive an invalid command response.

In the example below the user included a space in the contrast command.

INCORRECT

```
>set contrast=65
invalid cmd=set contrast=65
```

NOTES
- Use ASCII formatted commands.
- Commands aren’t case-sensitive.
- Review each entry carefully before you press ENTER.
- Don’t send another command until you receive the response and the next command prompt.
APPENDIX B
REMOTELY MANAGING YOUR INTERACTIVE FLAT PANEL

Command inventory
The interactive flat panel responds to the commands in the tables on the following pages.

Viewing a list of available commands
You can view a list of available commands by typing `?` at the command prompt.

Identifying current values
You can identify the current value for each setting. In the example below, the user wants to identify the contrast level for the interactive flat panel.

```plaintext
>get contrast
contrast=55
```

Assigning a specific value
You can assign a specific value for a setting within the command’s target range. In the example below, the user wants to set the contrast level for the interactive flat panel to 65.

```plaintext
>set contrast=65
contrast=65
```

Increasing a value for a setting
You can increase a setting by a designated number. In the example below, the user wants to increase the contrast level for the interactive flat panel by 5.

```plaintext
>set contrast +5
contrast=70
```

Decreasing a value for a setting
You can decrease a setting by a designated number. In the example below, the user wants to decrease the contrast level for the interactive flat panel by 15.

```plaintext
>set contrast -15
contrast=55
```

Designating video control settings for a specific video input
When you connect multiple video inputs to the interactive flat panel, you can designate different settings for each video input. You can also specify which video input you want to get information about or assign values to.

NOTE
You must connect the video input to the interactive flat panel to identify or assign a value for it, but the video input doesn’t need to be in use.
Identifying the value for a video control setting
Use the `get` command to identify values for a video control setting. In the example below, the user wants to identify the contrast for the HDMI1 video input.

```
>get contrast hdmi1
contrast hdmi1=65
```

Assigning a value for a video control setting
Use the `set` command to assign values for a video control setting. In the example below, the user wants to set the contrast to 70 for the HDMI1 video input.

```
>set contrast hdmi1=70
contrast hdmi1=70
```

Commands
The following tables contain commands for your interactive flat panel.

Power state
Use the following commands to identify power state settings.

<table>
<thead>
<tr>
<th>Command</th>
<th>Response</th>
<th>Possible values</th>
<th>Standby mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>get intpowerstate</td>
<td>intpowerstate=[Value]</td>
<td>• on</td>
<td>Yes</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• standby</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• dpms</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• novideo</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• confirm</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• proximitywait</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• welcome</td>
<td></td>
</tr>
<tr>
<td>get powerstate</td>
<td>powerstate=[Value]</td>
<td>• on</td>
<td>Yes</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• off</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• standby</td>
<td></td>
</tr>
</tbody>
</table>

Use the following commands to assign power state settings.

<table>
<thead>
<tr>
<th>Command</th>
<th>Possible values</th>
<th>Response</th>
<th>Standby mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>set powerstate [Value]</td>
<td>• =on</td>
<td>powerstate=[Value]</td>
<td>Yes</td>
</tr>
<tr>
<td></td>
<td>• =off</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• =standby</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## Source

Use the following commands to identify source settings.

<table>
<thead>
<tr>
<th>Command</th>
<th>Response</th>
<th>Possible values</th>
<th>Standby mode</th>
</tr>
</thead>
<tbody>
<tr>

SMART Technologies supports global efforts to ensure that electronic equipment is manufactured, sold and disposed of in a safe and environmentally friendly manner.

Waste Electrical and Electronic Equipment (WEEE)

Electrical and electronic equipment contain substances that can be harmful to the environment and to human health. The crossed-out wheeled bin symbol indicates that products should be disposed of in the appropriate recycling stream and not as regular waste.
