SMART Board interactive flat panel - Models 8055i and 8055i-SMP

# **Standard features**

DViT® (Digital Vision Touch) technology uses digital cameras to track objects interacting with the surface. Cameras can recognize finger, pen and eraser touch.
Supports multitouch gestures
The Orientation button on the color select module enables you to adapt the touch control to various screen resolutions.
The interactive flat panel has two presence detection sensors on its frame that can detect people up to 16' (5 m) away. When the sensors detect people in the room, the interactive flat panel turns on. When the sensors no longer detect people in the room, the interactive flat panel turns off.
The pen interacts with the interactive flat panel to draw digital ink. Buttons on the color select module enable you to select pen color. The bottom frame of the interactive flat panel has magnetic slots for the two included pens.
The interactive flat panel has a magnet-mounted eraser.
You can connect a keyboard or press the Keyboard button on the color select module to use the on-screen keyboard.
The Help button on the color select module enables you to access product help.
