Chapter 1

About SMART Response™

SMART Response™ interactive response system is an assessment tool that enables teachers to pose questions to find out whether students are on track.

This guide explains how to set up your SMART Response system. You can create a question in SMART Notebook™ collaborative learning software, start a class, and then connect students' Internet-enabled devices to the class so they can answer the question.

For more detail, see the *SMART Response User's Guide* on the Education Software DVD or on the SMART website. After you install the software, you can consult the online Help system for information about SMART Response assessment software's features.

Chapter 2

Setting up SMART Response

IMPORTANT

- You must activate your SMART Response software within 30 days of installation to keep it active.
- If the activation is not successful, refer to procedures in the *SMART Response User's Guide* on the Education Software DVD to find your license code and activate the software.

SMART Response system tools in SMART Notebook software

When you install SMART Response assessment software it integrates the following tools into the SMART Notebook software interface:

- *Response* menu item
- *SMART Response Assessment Software* tab
- *Insert Question* button
- *Start Assessment* button

For more information about these tools, click **Help > Contents** or see the *SMART Response User's Guide* on the Educations Software DVD.

CHAPTER 2

Setting up SMART Response

Selecting the SMART Response mode

The first time you plug in your receiver's USB cable, the SMART Response *Setup Tool* appears.

If you aren't using a receiver in your SMART Response system, you can follow this procedure to set the mode.

■ To set the SMART Response mode

1. Click the **SMART Response**  icon in the Windows notification area or Mac menu bar, and then select **Setup Tool**.
2. Select the **SMART Response VE** option, and then click **OK**.

Chapter 3

Using the SMART Response system

Before you begin, make sure SMART Notebook software and SMART Response software are installed on your computer.

■ To create a question using the Insert Question wizard

1. Click the **SMART Response** icon  in the Windows notification area or Mac menu bar, and then select **Open Notebook Software**.

A blank SMART Notebook page appears.

2. Click the **SMART Response** icon  on the toolbar.

The *Insert Question*  and *Start Question*  icons appear on the toolbar.

3. Click the **Insert Question** icon , and then click **Insert Question**.

The *Insert Question* wizard appears showing different question types.

4. Click the thumbnail of the question type you want to add, and then click **Next**.
5. Type the question in the text box, and then click **Next**.
6. Select or type the correct answer or select the **Opinion** option, and then click **Finish**.
7. If you want to save the question as a .notebook file, select **File > Save As**, browse to a folder, type a file name, and then click **Save**.

■ To start a class

Select **Response > Start Class > Anonymous Mode**.

You can now ask a question.

CHAPTER 3

Using the SMART Response system

■ To ask a question

1. Click **Start Question**  on the toolbar.
The *Assessment Started* message box appears showing the SMART Response VE website URL and the Assessment ID.
2. Record the URL and the Assessment ID, and then click **OK**.
You must provide this information to the students.
3. Ask the students to use the procedure below to connect their Internet-enabled devices using this information.
4. After all students answer the question, click **Stop Question** .
The students' Internet-enabled devices show their results, and the results appear in the SMART Notebook *Response* tab.

■ To connect Internet-enabled devices to the class

1. Open a browser and connect to response.smarttech.com.
The *SMART Response VE* login page appears.
2. Type the Assessment ID into the text box, and then click **Sign In**.

NOTE

The Student ID isn't required in Anonymous mode.

The question appears on the student's screen.

CHAPTER 3

Using the SMART Response system

Question types

Using SMART Notebook software with SMART Response software in VE mode, you can ask the following types of questions, either individually or as question sets (if you include a title page). You can also add notes to any question type that appears when you print the question results.

Question type	Description
Yes or no	Students use the Yes or No button to answer a question. You can also choose the Opinion option to allow either answer.
True or false	Students use the True or False button to answer a question. You can also choose the Opinion option to allow either answer.
Multiple choice	Students use a single button, A through J , to answer the question. You can select from 2 to 10 answers for a question. You can also choose the Opinion option to allow any answer.
Multiple answer	Students use the A through J buttons to select the correct combination of answers to the question. You can select from 2 to 10 answers for the question. You can also choose the Opinion option to allow any combination of answers.
Text answer	Students type the answer to the question. There is a 20-character limit on answers to text answer questions. You can also choose the Opinion option to allow any answer. Students can type up to 140 characters when answering opinion questions.
Number, fraction or decimal	Students use the number keys to type the answer to the questions using whole numbers, fractions or decimals. You can also choose the Opinion option to allow any answer.
