

Business training

SMART Meeting Pro™ Premium software

SMART Meeting Pro and SMART Meeting Pro Premium Customized Training

On-site training

Customized training can include any combination of training content to meet your organization's needs. Contact us at smarttech.com/contacttraining for more information.

SMART Meeting Pro Premium Learn at Lunch

Live online training

In this session, a SMART trainer connects to your meeting room with conferencing software and a conference call, and shows you how to use SMART Meeting Pro Premium software to work more efficiently.

Getting Started with SMART Meeting Pro Premium

Self-paced e-learning

This course gives SMART Board® interactive whiteboard users an introduction to the basic functionality of SMART Meeting Pro Premium software.

SMART Meeting Pro and SMART Meeting Pro Premium

Self-paced e-learning

This course gives you the skills you need to use SMART Meeting Pro and SMART Meeting Pro Premium software.

SMART Bridgit® conferencing software

SMART Bridgit Training

Live online training or self-paced e-learning

Learn how to use SMART Bridgit conferencing software to collaborate, teach and present remotely. You'll learn how to create and join a conference, share desktops, use collaborative tools, and configure Voice over Internet Protocol (VoIP) and webcam options.

SMART Bridgit System Administrator Training Level 2

Self-paced e-learning

This course has been specifically designed for those who already possess network administration skills, and covers network deployment through command line install. Additional resources and tools to help with SMART product installation will also be explored.

Business resources

SMART™

Extraordinary made simple

Use-case consulting

SMART conducts comprehensive evaluations of use-case scenarios that are relevant to your business. We design and implement custom training plans that focus on your business objectives and bring your people up to capability incrementally, with minimal disruption to productivity.

At the start of each training program, we establish key performance indicators to measure your return on investment (ROI) and set guaranteed minimum achievement levels. We track and perform progress evaluations, and refresh your professional development plan quarterly.

Leverage your existing e-learning system

SMART offers Sharable Content Object Reference Model (SCORM) compatible e-learning materials that you can upload and manage on your own learning management system (LMS). Save time and money by using ready-made, professionally-developed materials that rapidly bring your staff up to speed and smooth the transition to new technology products.

More resources for business and government

We take pride in designing solutions that enable effective collaboration and information-sharing in the workplace. Visit smarttech.com/trainingforbusiness and access a wide variety of resources to help you learn how to use SMART products quickly and easily. You can download and print many free resources from this web page for easy reference.
