

Training

Notebook™ software training for SMART Board™ users – Level 2

Learn how to design lesson activities in Notebook collaborative learning software by adding style and incorporating interactive content at a full-day professional development event.

What to expect

- This event is led by a SMART Certified Trainer who works with SMART products every day. By the end of the event, you'll be comfortable creating and organizing lessons using the SMART Board interactive whiteboard and Notebook software.
- You will receive a level 2 Notebook software learner workbook that includes reference material, step-by-step activities and review exercises. The workbook is used during the session and is an excellent future reference.
- You will have time to ask questions and create interactive lesson activities

The modules – agenda and content

A training event includes morning and afternoon breaks, a one-hour lunch and the following distinct learning modules:

- Intermediate design in Notebook software: Learn how Notebook software can help you to structure lessons more effectively. Use new tools and add rich media content to lesson activities.
- Delivering lessons and leveraging interactive tools: Learn best practices for teaching with an interactive whiteboard. Discover the differences between using Notebook software to create presentations in advance and using the software spontaneously in your classroom.
- Tools for assessing student learning: Review the science of evaluation and assessment, and build assessment activities. Learn how to use Notebook software in your formative and summative evaluations of your students and their work.
- Additional resources: Find out how SMART supports you with a number of resources, including free training materials and an online community

"The training was really great, and the knowledge and resources that I returned with have helped with giving teachers more hands-on learning."

C. Moyer, TX

Who should attend?

- Users of SMART Board interactive whiteboards or Sympodium™ interactive pen displays who have completed Notebook software training level 1, attended a SMART Master's event or who have at least one year of experience using Notebook software
- K-12 instructors, higher education instructors and corporate trainers

Customer requirements

- All participants should have basic knowledge of Microsoft® Windows® or Macintosh operating systems

How can I prepare for the session?

Review SMART's training center learning path at www.smarttech.com/trainingcenter.
