## SMART Senteo Interactive Response System Training Session

For users who want a comprehensive overview of the system and hands-on practice in developing assessments.

### What to expect

- You will be comfortable using Notebook™ software and the Senteo™ interactive response system in your classroom
- You will receive a *Senteo Interactive Response System Learner Workbook*. It includes reference material, step-by-step instruction and hands-on practices. The workbook is used during the session and is an excellent future reference.
- You will get hands-on practice building class lists, and designing and delivering assessments using Senteo assessment software
- Sessions are delivered using Senteo assessment software with the Microsoft® Windows® operating system, and each session is led by a SMART Certified Master's Trainer

### Who should attend?

- Primarily aimed at K–12 instructors. Higher education instructors and corporate trainers may also find the course useful.
- Participants who wish to attend a Senteo interactive response system half-day training session should have completed at least one of the following: attended a half-day SMART Master's session, or have used Notebook software on a regular basis for at least one year

## Session contents

I. *Getting started:* Understand the basic components of the Senteo interactive response system.

II. *Using the Senteo interactive response system with PowerPoint® software:* Learn how to create Senteo interactive response system questions within your existing PowerPoint slides, and how to run questions and view results through PowerPoint software.

III. *Using the Senteo interactive response system with Notebook software:* Learn about Senteo assessment software tools in Notebook software, including how to ask instant questions, create question sets and deliver summative assessments.

IV. *Advanced features in Senteo assessment software:* Learn how to import questions from your existing Microsoft Word software or XML quiz files, and how to export results to a Microsoft Excel® spreadsheet. You will also learn about the advanced printing options in Notebook software that allow you to deliver your Senteo assessment software quizzes as printed tests.

V. *Additional features:* Learn how to integrate the Senteo interactive response system with the SMART Board™ interactive whiteboard, and how to access student and clicker history within the Senteo Manager.

VI. *Additional resources:* Discover how SMART Technologies Inc. supports you with access to software downloads, educator resources and SMART's training center.

## Customer requirements

- All participants should have a basic knowledge of Microsoft Windows or Macintosh operating systems prior to the session
- A room that will comfortably hold 15 participants and an instructor
- Access to the Internet (recommended but not required)
- Access to a computer network (recommended but not required)
- One computer with up to date SMART Board software and Senteo assessment software installed
- One computer per two participants with Senteo assessment software installed on each computer in order to participate in the hands-on practice (1:2 ratio). The recommended set-up ratio is 1:1.
- Projector
- Screen or SMART Board interactive whiteboard – a projection surface is required
- Fifteen Senteo interactive response system clickers
- One Senteo interactive response system receiver
