

Training

Subject-specific event at SMART

Learn to create and enhance your lessons for the SMART Board™ interactive whiteboard at a half-day professional development event

What to expect

- Integrate the interactive whiteboard into your classroom and curriculum
- Create and present dynamic, subject-specific lessons and activities
- Enhance your existing resources with a SMART Board interactive whiteboard
- Collaborate with professional educators to create new lesson resources
- Receive a *SMART Board Interactive Whiteboard Learner Workbook, Tips and Tricks, Notebook™* software activity guide and additional reference materials

Unless otherwise indicated, sessions are delivered using SMART Board software with the Microsoft® Windows® operating system.

Who should attend?

- K–12 instructors who are intermediate SMART Board Interactive whiteboard users
- Participants should have a basic knowledge of Notebook software and have worked on a SMART Board interactive whiteboard for a minimum of one year or have previously attended a full-day SMART Master's event

What to bring

- Textbooks, curriculum materials, lesson plans
- Topics you want to focus on when creating lesson activities
- Laptop with current SMART Board software (optional)

"The advanced mathematics training event that I attended was absolutely amazing! It was one of the most beneficial professional development activities that I have ever attended."

C. Woodburn, KS

"The training was really great and the knowledge and resources that I returned with have helped with giving teachers more hands-on learning."

C. Moyer, TX
